

Pull-along mummy & baby turtle

Mummy and baby turtle will have a helping hand in your child's walking and **gross motor skill** development. Mummy turtle can be pulled forwards in 2 different ways: via the string or using the handle on top of the shell. Baby turtle can easily be grasped and played with as a figurine. To further promote little ones' **dexterity**, they can also try to slot the baby turtle into the shell.

Small musical-awakening stand

This pretty wooden musical-awakening stand comprises 3 sound-producing toys positioned on a board: a rattling tree that makes a clicking noise, a rotating water lily that makes a grinding noise and a baby bird that makes a tweeting sound.

3 toys – each with their own individual sound function – to promote children's **musical development** and **movement coordination**.

ENG

Perfecting their fine motor skills

+18m

This box has been developed in collaboration with a psychomotor specialist to create and design 4 toys aimed specifically at the developmental stage of little ones aged 18 months and up.

The box focuses on fine motor skill development. By using their hand and finger muscles, your child will learn to better control their gestures. The Janod Box will promote your child's early-learning discoveries and skill development.

Head to our website – www.janod.com – to discover additional games that will complement the box for ages 18 months +.

MY CHILD'S DEVELOPMENT AT 18 MONTHS

Your child is progressing at breakneck speed! Games that combine dexterity with creativity are now a must. Their vocabulary is expanding, they are becoming more curious and above all, they are beginning to want to do things for themselves. All these newly learned or perfected skills awaken new emotions, which they will gradually learn to control.

To each their own pace: The above-mentioned skills are simply benchmarks and should in no way be followed to the letter; each child develops at their own pace.

Fish-shaped threading beads

The little bear cub is going fishing today! Threading beads are the perfect toy when it comes to **fine motor skill** development. A wooden guide makes threading the 6 wooden fish a lot easier for your child. Little ones will also develop their bimanual and hand-eye coordination skills.

They can also expand their vocabulary by starting to **learn the colours**.

"Dream" chunky puzzle

A wooden chunky puzzle with a lulling theme. The thick pieces have been designed specifically for little hands to help improve grip. Furthermore, little ones can either correctly position the 4 pieces on the wooden board or use them as figurines.

Each slot on the board boasts the same colour as its corresponding piece to help your child find the correct location. This puzzle is ideal for developing **fine motor skills** and promoting **imagination**.
